

Job Grading: shared facts

Day 3 · Session 2 | Both sectors | Shared resource

FICTIONAL TRAINING EXERCISE. Use only your assigned role. A role label separates downloads for the exercise; files on this public website are accessible to anyone with the link.

Kiptenai County Referral Hospital and Bomani County are fictional labels for a training scenario. The grading dispute and all figures are illustrative. Check actual authority, SRC advice and the applicable job-evaluation process in a real case.

Background — Read by Both Teams

Eighteen months ago, Kiptenai County Referral Hospital installed a new CT scanner. Two senior radiography technicians, employed at Job Group K, completed approved equipment training and worked under appropriate professional supervision. Their responsibilities expanded beyond their existing job descriptions. For this fictional exercise, they have performed the expanded duties for over a year without additional pay or formal recognition.

The county branch of the health workers' union raises a formal grading dispute seeking upward regrading and backdated pay. Management and the County Public Service Board must respond. Teams receive their briefs at 11:00 on Wednesday and negotiate at 14:00 after lunch.

Before a Real Agreement

Exercise mandates do not override law. Confirm the actual employer, bargaining authority, SRC advice where applicable, lawful appropriation, approvals, implementation responsibilities and any required registration. A no-agreement outcome must be evaluated against the parties' alternatives; it is not automatically lose-lose.
