

Public Health Simulation Shared Facts

Day 4 Session 4 | Plenary A | Shared resource

Fictional training exercise. All institutions, disputes, mandates and figures are invented for learning.

Both teams in this sector read these facts. Each side also has its own separate confidential brief.

Also on the agenda: The night-duty roster. Rosters are issued one week at a time, and maternity and long-term sick absence is covered by whoever is left on the ward rather than by funded relief. About seventy per cent of the county's health workforce is female.

The employer: Mwangaza County Government. About 2,400 health workers across 43 facilities, from two sub-county hospitals to dispensaries.

The union: The county branch of a national health workers' union, representing roughly 1,900 of those staff.

The agreement: A risk and hardship allowance, agreed nationally, to be introduced in three annual phases. Phase one was paid in full.

The dispute: Phases two and three have not been implemented. Two financial years have passed.

The cost: Completing phases two and three: about KSh 186 million a year. Accumulated arrears from the stalled period: about KSh 240 million.

The fiscal position: The county wage bill is about 43% of total county revenue excluding extractive natural resources revenue, against a statutory ceiling of 35%.

Comparators: Of the five counties in the region, two have completed all three phases, three have not started phase two.

Today's meeting: Convened after the union served notice of a dispute. Both sides have agreed to meet before any further step is taken.
